

REMOTE CONTROL AT A GLANCE

Power:
self-explanatory.

AV: alternative video.
Plays a Brazilian documentary about disability allowance.

Drive Select:
park, neutral, forward, reverse.

1-10: calculator function.

Delete: deletes the remote control.

Skip/Index:
online list of excercises
(see "manual skip")

Pause:
Close your eyes and lie back whilst holding this button.

Stop: stops.

Guide:
this is the button you want. It summons a young girl guide who will know instinctively how to use the remote. May not function in all areas.

Status: displays a message saying "48 inch flatscreen"

Direct Navigator:
as opposed to indirect navigator.

Sideways:
moves the TV to left or right to facilitate hoovering.

Option: this button is optional.

Rec:
reconsider.

Rec Mode:
reconsider your mode.

TEXT:
stands for Transmitter Enhanced External Tone.

STTL:
settle. Leaves the TV on the Nature channel reduces the volume, turns down the treble and makes you a cup of tea.

Display:
activates the "screen" - the large glassy area on the front of the set, which can supplement audio programs.

Channel up/down:
makes the channel go up and down

Volume:
the overall size of the TV set; similar to "inflate/deflate".

Prog Check:
transfers money to the account of the man who programmed the remote (American spelling)

Input Select:
jumps to the Food channel.

Manual Skip:
allows the mains lead to be used for on-the-spot exercise.

Slow/Search:
makes the TV run slower while you look for the remote to change channel, so you don't miss too much.

Play: converts the TV to an Aibo.

Exit: allows you to leave the room.

Function Menu:
pauses the programme for you to go to the loo (user-selectable time delay, depending on function expected).

Return:
self explanatory; only applies if you have kept the receipt for the remote.

Create Chapter:
allows you to form a small local group of sheep worshippers.

Ext link:
this basically exts your link. You should do this every 2-3 weeks to clear the buildup of electrons in the aerial.

Timeslip:
Measures the duration of a slip.

Jet Rew:
must be used the first time the set is turned on, to prevent a dangerous buildup of protons in the capacitive discharge circuit.
