WHICH COMPUTERS ARE BEST?
APPLE IBM OR MORROW WHICH IS BEST?

The best way that I have found to compare computers is to add up the prices of the hardware and software to do the job you have in mind. The illustrative job that I have chosen is, "RUN A SMALL BUSINESS WITH THE AID OF A COMPUTER". For this job the hardware you need is the computer proper with two disk drives, a keyboard, screen, printer and software. The software you need is an operating system, BASIC, word processor (for letters), spelling checker, spread sheet (to figure costs), data base (inventory etc) and a bookkeeping system. The IBM PC I priced had an inventory program instead of a data base.

PRICE COMPARISON

	APPLE IIe	IBM PC	MORROW MD3 MICRO DECISION COMPLETE PACKAGE *
HARDWARE AS DESCRIBED ABOVE PLUS SOFTWARE DESCRIBED	\$3030 1255	\$3963 1300	
TOTAL PRICE LIST	\$4285	\$5263	\$2226
LESS DISCOUNT OFFERED	600	000	441
NET PRICE	\$3685	\$5263	\$1785

The IBM price is from Computerland, no discount was offered. The Apple price is from a local retailer. The Morrow Micro Decision price is from American Square Computers. *Morrow also includes four extra BASICS, the Pilot language and a List Manager at no EXTRA charge.

SHAME

Isn't it a shame that IBM, who is so rich and powerful, derives so much of its money from the United States government through computer sales, has so much money given to it in government research grants, and then charges the government for the products of the research, isn't it a shame that they choose Charlie Chaplin as their symbol, Charlie Chaplin who was barred from this country for his pro-Communist activities? When the Soviet Communists shot down the Korean airliner and killed so many men, women, and children, IBM should have stopped glorifying Communist Charlie Chaplin. When the Communist-trained and financed terrorists murdered over 200 of our Marines in the Beirut, Lebanon barracks bombing, IBM should have stopped their glorification of Communist Charlie Chaplin, but no, they go right on. The irony of it is that our boys were defending IBM too when they gave their lives. Does IBM care how many American boys are killed by the Communists while their Communist "funny man?" keeps their cash registers ringing? Shame!

Apple is a member of the "Resist the Draft" gang. They even had it put in their Logo. Left wingers are quick to criticize the American military, but they never do anything against Soviet or Cuban military expansion or atrocities. Shame on them!

Because this is a free country we put up with BLOODY-MONEYBAGS IBM and the ROTTEN APPLES, but we don't have to buy anything from these SCOUNDRELS!

If you are buying just one or a hundred the principle is the same, don't buy from Communist sympathizers while our boys are being blown to bits!

Lets give LOYAL AMERICANS like George Morrow, the people at Smith-Corona, Televideo or ADDS etc. our support and business!

XEROX this 10 or 100 TIMES and PASS IT ON!
