

# More Songs From Balticon

Balticon is an annual science fiction convention, a four day celebration of Science Fiction and Fantasy which has been taking place since 1967.

Over fifteen hundred fans of all backgrounds gather to celebrate speculative fiction with diverse programming, from award winning authors and publishers to twitch live-streamers, from cosplay experts to renowned scientists and tech innovators.

In addition to the many other events, Balticon has run a music program since the very beginning, and Kludge Audio is releasing a new compact disc set with samples of their very diverse music programming.

Not only limited to “filk music” (traditional folk music as adapted by the speculative fiction community), this album has something for everyone and shows a huge range of music styles.

A follow-on to Kludge Audio’s *Balticon Tapes* (Kludge CD-120) it is an album which deserves your attention.

Information about Balticon can be found at <https://www.balticon.org> and information about Kludge Audio’s production services can be found at <https://www.kludgeaudio.com> for the curious.

We hope that you will add some of these tracks to your playlist. We can be reached at [kludge@panix.com](mailto:kludge@panix.com). Thank you for your time and consideration.

## Suggestions for Radio Airplay
