

Do you want to

- Learn a language in less than five years?
- Find friends around the world?
- Make the world a better place?

No? None of these? Then definitely don't learn Esperanto, go do something else with your time.

But if any of these sound good to you... consider learning Esperanto.

- The grammar is very regular and streamlined, so you can learn it *four times faster* than other languages. Completely phonetic, no huge lists of conjugations and exceptions. And it's a great introduction to learning other languages!
- About *two million people* speak it, so you can make friends around the world. Without forcing them to learn English and speak up-hill to you.
- And it doesn't come from any single country or culture, so people all over the world learn it. It's the second language that everyone can share!

Esperanto — the international language *that works!*
